

Meet your new teachers

Welcome to our class,

I am Mrs Hatton, and I will be one of your teachers this year. I will teach you on Monday, Tuesday, Wednesday and Thursday morning. I love spending time with my two children Thomas who is 15 and Kitty-Rose who is 12. We like going for walks along the beach looking for sea glass and shark teeth. Both of my children are very sporty. At the weekends I love watching my son and daughter play football although I am not keen on going when it is pouring with rain. They both also do athletics and compete in athletic competitions for Thanet Athletics club which is great fun to watch as well. I have 2 cats called Otto and Robin. Otto is big, fluffy and loves his tummy rubbed. Robin is smaller and she loves to chase flies.

At school I like teaching all the subjects, but my favourite subjects are art, maths and ICT. Art because we can be creative and explore different types of art such as painting, drawing and clay, ICT because we get to explore coding and maths; I enjoy seeing the children in my class learn new mathematical concepts. I also love all the different topics we teach in Year 2, especially science because we explore different things in our world, ask questions, make predictions and we even get to do experiments.

I am very excited and happy to be one of your teachers next year and I look forward to meeting you all. I might have even taught some of you when you were in reception.

Hello everyone,

I'm Ms Webber and I'm very happy to be one of your Year 2 teachers. I will be your class teacher on a Thursday afternoon and all day Friday. (I will still be your RE teacher too!)

I moved to Thanet from Australia thirteen years ago and consider myself very lucky to have become part of the Cliftonville Primary School community. I enjoy spending time walking along the beautiful coastline of Thanet, growing my own vegetables, playing with my cat and curling up with a good book. Mystery books are my favourite as I love trying to solve the mystery as the story unfolds.

Year 2 is a very exciting year, with interesting topics and plenty of fun activities. Enjoy the summer holiday. See you soon.
