

Writing Progression In Non-Chronological Reports

Year 1

Mandrills are the world's biggest monkey. They are colorful but have unhappy faces. Boy mandrills are bigger and girls mandrills are smaller. They are hunted by cheetahs. Mandrills like eating grass and frogs. The mandrills like to play in the ground and they like sleeping in trees.

Year 2

Appearance: what do they look like?
 All the unicorns are beautiful. They have
 a long shiny horn and its very useful
 because when its dark their horn * glows
 to help them see. Did you know that they
 have a special Sun mark on their hip? They
 have a long bushy tail.

Behavior: what do they look like?
 Unicorns can do amazing things. They
 can grant wishes and give good dreams to
 everyone. Did you know that their power full
 horn makes the sun rise?

Habitat: where do they live?
 Unicorns are always cozy. They live
 in a mossy cloud castle. All when its
 raining they hide inside the Sun. Did you
 know that unicorns sit on clouds.

Year 3

TOMTOM

Introduction

Introduction
The Animal is called TomTom because I found one eating the roots of
so the TomTom bee which like TomTom grows ~~long~~ dangling on the TomTom
branches. I'll dive today.

Appearance

Appearance
TomTom has a big, heavy body of shiny green, gold, red and black. He has low milk white gargoyle ~~just~~ sticks out of his smaller teeth. He has sharp ears, white sharp to hearing and a high of hair on his back. He has ~~no~~ claws with wire aqueducts made for blood drinking.

Habitat

[illegible]

Special Features

Tom Tom's tale gets a can gold in and makes the shape
sp by a pussy cat tale. He and then spikes come out of it.
sp To each his good with is gling gling gling cheer ball
with his ^{clinking} poison with clings on to his teeth. His other
way to catch gling cheer balls is his gir. His gir
smells of burning toast and cheer balls love toast so
they can become cheer on toast. He has super
sharp appetite.

Conservation

~~2~~ of the 120 mites he may die but definitely struggle. Tortons can be hunted by humans because of their individual spikes. The cure for Mites is to eat big bugs. The Mites is made by a bob and it's big. The big slice from the bob that Tortons.
